

## Explanation of Safe Exam Browser Settings (SEB)

1. When setting up a Quiz, locate the setting heading Safe Exam Browser and select **Yes - Configure manually**.

### Safe Exam Browser

Require the use of Safe Exam Browser 

Yes – Configure manually 

---

*Once you have configured Safe Exam Browser for the first time, you will have the option to download and save this configuration for future quizzes. This will allow you to Yes – upload my own config*

#### Safe Exam Browser

Require the use of Safe Exam Browser  Yes – Upload my own config 

Upload Safe Exam Browser config file 

- No
- Yes – Configure manually
- Yes – Upload my own config
- Yes – Use SEB client config

Files

Maximum file size: Unlimited, maximum number of files: 1

- 
2. It is recommended to have the **Show Safe Exam Browser download button** set to **Yes** so that students will be able to download the browser if they haven't done this ahead of time.
  3. For the **Show Exit Safe Exam Browser button, configured with this quit link** any URL you enter here will be linked to from an **Exit Safe Exam Browser** button on the page that appears after the exam is submitted. If the field is left empty, then the button will not appear.
  4. **Ask user to confirm quitting** - If enabled, users have to confirm quitting of Safe Exam Browser when a quit link is detected. Note this setting does just affect quitting with the quit link and doesn't affect quitting with the "Quit" button, Ctrl-Q or the close button in the main browser window.
  5. **Enable quitting of SEB** allows you to set whether users can quit Safe Exam Browser with the **Quit** button in the Safe Exam Browser task bar or by pressing the keys Ctrl-Q or by clicking the main browser window close button.
  6. **Quit password** makes it possible to provide a password that students will need to enter when they try to quit Safe Exam Browser with the **Quit** button, Ctrl-Q or the close button in the main browser window. If no quit password is set, then Safe Exam Browser will prompt *Are you sure you want to quit Safe Exam Browser?*
  7. **Enable reload in exam** set to Yes will allow page reloads during a quiz (reload button in Safe Exam Browser task bar, browser tool bar, iOS side slider menu, keyboard shortcut F5/cmd+R). Offline caching might break when the user tries to reload a page without an internet connection.

8. **Show SEB task bar** allows you to set whether users are shown the Safe Exam Browser task bar.
9. **Show reload button** allows you to set whether users are shown the reload user interface element in the task bar bottom right corner.
10. **Show time** allows you to show users the current time in the task bar. This is not the time remaining for the quiz.
11. **Show keyboard layout** allows you to set whether users are shown an element in the task bar to choose the keyboard layout. This feature is available only in Windows operating system.
12. **Show Wi-Fi control** allows you to set whether users are shown an element in the task bar to choose Wi-Fi connections they may have previously connected to. This feature is available only in Windows operating system.
13. **Enable audio controls** allows you to set whether users are shown an element in the task bar to change the audio volume. This works only in Windows operating system.
14. **Mute on startup** - Set whether the audio volume is initially mute when Safe Exam Browser launches. This feature is available only in Windows operating system.
15. **Enable spell checking** - Set whether spell checking is enabled in Safe Exam Browser. Enabling this feature will correct spelling automatically.
16. **Enable URL filtering** - Set whether URL filtering is enabled in Safe Exam Browser. URL filtering allow access to specific webpages, documents or sections of websites.
